Art Unit: 3617

Specification

1. The disclosure is objected to because of the following informalities: On the first page of the specification the Inventor's name and address should be deleted as it is unnecessary.

The remainder of page 1 would be suitable for the Brief Description of the Drawings section of the specification.

The Background of the Invention and the Brief Summary of the Invention should be placed before the Brief Description of the Drawings.

The sections titled Brief Description of the Several Views of the Drawing and the Detailed Description of the Invention should be combined to form the Detailed Description of the Invention, which should contain all of the reference characters used in the drawings.

On page 3, the three sentences relating to matters not applicable, such as those ending in "N/A" at the top of the page can be omitted since they are not relevant.

2. A substitute specification is required pursuant to 37 CFR 1.125(a) because of the informalities noted above.

A substitute specification must not contain new matter. The substitute specification must be submitted with markings showing all the changes relative to the immediate prior version of the specification of record. The text of any added subject matter must be shown by underlining the added text. The text of any deleted matter

Art Unit: 3617

must be shown by strike-through except that double brackets placed before and after the deleted characters may be used to show deletion of five or fewer consecutive characters. The text of any deleted subject matter must be shown by being placed within double brackets if strike-through cannot be easily perceived. An accompanying clean version (without markings) and a statement that the substitute specification contains no new matter must also be supplied. Numbering the paragraphs of the specification of record is not considered a change that must be shown.

3. Applicant should submit an argument under the heading "Remarks" pointing out disagreements with the examiner's contentions. Applicant must also discuss the references applied against the claims, explaining how the claims avoid the references or distinguish from them.

Suggestion

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer
